Dear Sirs

Further to my letter to you in October last regarding the first meeting Maureen and I had with the Beresfords Personal Wealth Management team, I would now like to bring you up to date.

We received their very comprehensive Statement of Advice, had further discussions with them and our Accountant and are now putting in place new financial and legal structures covering our business debt, our retirement/superannuation benefits, our personal insurance and our estate planning.

Sitting down with James and Trudi Beresford and really focusing on our objectives and goals into and during retirement has been so enlightening and now that we have a 'plan' in place, with guidance only a phone call away, we feel so much more comfortable and secure with our future.

We are also very happy knowing that by implementing the strategies and changes they have recommended our savings and wealth benefits at retirement will be greater, we will be paying less income tax and that decisions we will be making in the operation of our newsagency business between now and retirement have a purposeful timeframe and structure.

Their advice is managed on an hourly rate basis and not skewed by product fees and commissions. Their service is designed to keep you informed and involved and in control of your strategy.

So, all in all, in my opinion the Beresfords Personal Wealth Management team is professional and of very high integrity. They exhibit a positive, enthusiastic and caring attitude along with advice and recommendations one can't afford to miss the opportunity to have.

Yours truly
Paul Blunden
